

## War Time Efficiency

Is Making Every Minute Count

The time you spend dusting, cleaning and polishing floors and woodwork the old way is time wasted.

The energy you spend is energy wasted—and time and energy is money.

The easy—the quick—the labor and time saving way is the O-Cedar way. You save time, work, energy and money.

## BIG LEAGUE CLUBS TO BE HIT BY "WORK OR FIGHT"

Two Hundred and Sixty-Three Players to Be Affected by Ruling If It Is Enforced.

That practically all of the big league teams will be relieved of the majority of their players if the "work or fight" rule affects the baseball players is now an established fact.

About 90 per cent. of the players in the big league clubs are in the draft age and the clubs will be broken up if the rule is applied.

The following list, clipped from the Atlanta Georgian, shows the players that will be affected by the ruling:

**American League.**

## First Sacker Konetchy Pitches Game for Braves

The news that Ed Konetchy, the big first baseman of the Boston Braves, had pitched a game for the Braves recently, recalls the fact that he had once before tried his hand at twirling. "Big Ed" was soundly thrashed in his latest attempt in the box. A few years ago, while playing with the Cardinals, he volunteered to finish a game after a Cardinal pitcher had retired. Konetchy held the opposing team, the Chicago Cubs, hitless during the remainder of the game, while the St. Louis club came from behind and won.

Shaw, Harper, Ainsmith, Judge Foster, Lavan, Morgan, Milan, Picinich, Hoville, Matteson, Shanks. Total, 15.

Philadelphia—Gregg, Myers, Adams, Perry, Perkins, McAvoy, Burns, Dykes, Watson, Munch, Jamieson, Kopp, Walker. Total, 13.

## "Fill Me Up With Your Cheapest—My Car is a Chalmers"

Ever heard that order given at a gasoline filling station?

You will if you just wait till a Chalmers drives up.

At some of the larger stations you'll see a row of three or four red pumps.

On each is a price, and in some cities the price will range from say, 20½, 23½, 27½ to 30 cents per gallon.

Watch the different makes of cars as they arrive for refilling of tanks.

The "temperamental" ones will insist on the high-test gasoline only. And pay the high price.

They will tell you, that, with the low-test gasoline, their cylinders fill with carbon, the carburetor will not function, and that the power produced is—nil.

Well—they ought to know. They are driving those cars.

The Chalmers owner is the exception to the rule.

He stops at the first pump—the cheapest, heaviest, low-test gasoline.

He knows he is buying a liquid that is practically kerosene. But he also knows his Chalmers motor will burn it—and consume it perfectly.

And if he knows all the facts he will appreciate also that there are more heat units per gallon in the heavy than in the lighter fuel.

So his efficiency is greater at the same time that his fuel bill is less.

Yes—you have it—the famous "Hot Spot" and the "Ram's Horn" manifold as you find them in combination only in Chalmers Motor Cars, are responsible for that condition.

You obtain a four-fold efficiency in a Chalmers—we'll tell you how in the next advertisement.

Meantime, drop in and let us show you just what the "Hot-Spot" and the "Ram's Horn" really are—what they accomplish—and how.

Then you will understand the reason for the tremendous popularity of the Chalmers—a popularity and a demand so great that everybody in the trade concedes, "This is Chalmers year."
